Bechtel Corporation
UPF Project
C/S/A Group Supervisor Opening

To Whom it May Concern,

I have been looking into openings at the UPF project and following it closely for the last 18 months, and was excited to see the C/S/A group supervisor opening post recently and I hope to be invited for an interview.

My background is primarily design and field civil engineering, but I also hold a Senior Reactor Operator certification from TVA, which provided me with a much broader experience base of operations as well as cross-discipline into electrical and mechanical. I recently sat for the Professional Engineer licensure exam in civil engineering, and expect to learn those results in the coming weeks. In addition to my background and training, I also have 4+ years as either an engineering manager or civil lead, with proven leadership and results in these positions.

I also bring strong computer skills and technical expertise in managing information and systems in a way to provide solutions to data management and organizational streamlining of processes to reduce cost and overhead.

I am confident that I can provide the leadership and decision making skills you are seeking for the C/S/A group at the UPF project. Please feel free to call or email me to arrange an interview - I look forward to learning more about the project and this opportunity.

Sincerely,

Robert N. Cole
